

# Chapter 1 Introduction to TCP/IP Networking

## TCP/IP History

- Networking Model (Standardized Model)
- Initially the TCP/IP model was created before the OSI Model by the DoD in late 1970s and then further developed by universities and alike.
- OSI was created by the ISO but became soon irrelevant because of the leading TCP/IP Model. Now it's mostly used for education.
- During the 1990s there was a mixed of OSI and TCP/IP

## Acronyms

TCP/IP Model = Transmission Control  
Protocol/Internet Protocol Model

OSI = Open Systems Interconnection Model

ISO = International Standardization  
Organization

DoD = U.S. Department of Defense

RFC = Requests for comments
